Methodological note

2022 financial statement includes balance sheets, management reports, mission reports and notes to the financial statement, approved by the Board of Directors and the Board of Participants on 30/06/2023. The Financial Statement is integrated by these documents as well as by the report of the independent auditing firm PricewaterhouseCoopers SpA, and by the report of the statutory auditor.

PRESIDENT

Dear readers,

After more than a year from its beginning, the conflict in Ukraine continues and there are no signs of reaching peace. With obvious and dramatic consequences: both humanitarian, as well as political and economical.

We will remember 2022 as the year we focused our efforts to find balance in front of the confusion generated by the continuous emergencies we are subjected. Hardly in fact, we would have expected to review our plans to bring aid under the bombs.

What began as a flash operation for the medical evacuation of 19 Ukrainian children suffering from cancer has grown into an international project that has saved from the bombs more than 2,000 children and young people sick and injured by the fighting.

2022 was also the year we celebrated 20th anniversary of Soleterre, continuing to offer support and care to young cancer patients and their families with the international program GREAT AGAINST CANCER.

With the belief that health is balance between body, mind and external environment, we have carried on the WORK IS PROGRESS activities dedicated to enhancing the potential of each individual by promoting their personal, cultural and occupational progress.

Over time we have seen that protecting people's health, by also protecting their family and social ties, greatly improves the chances of healing and reduces anxiety and stress levels.

Today we are receiving signs that our strategy is right, and for that I can only thank all of you.

Damiano Rizzi Soleterre-Onlus President

VISION

Soleterre's vision is a world where the the right to health is universal. Where even the most vulnerable people are not threatened by social, economic or cultural inequities. A world where everyone has access to care when they get sick, where they can really feel good (physically, psychologically and socially) when they are healed, a world where people do not risk violence because of who they are or what they believe in.

MISSION

Soleterre is a Foundation that works for the universal recognition and application of the right to health in its broadest and most integral meaning of psycho-physical and social well-being. For this reason, in addition to the commitment to guarantee medical care and assistance, Soleterre is active in safeguarding and promoting psycho-physical well-being for every person, in any social condition and in any part of the world. Soleterre is committed to the right to health and is prepared to intervene wherever inequity, inequality and violence prevent that right from being applied. Because health is social justice.

HEALTH - SOCIAL JUSTICE PEACE - SOLIDARITY

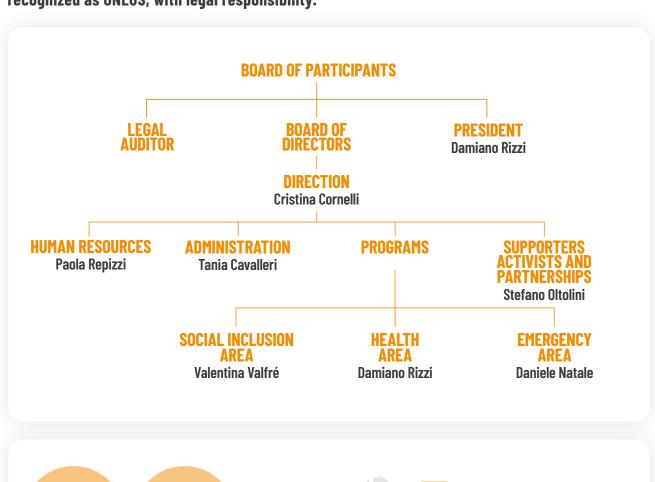

In 2022, Soleterre implemented **80 projects** across **8 countries** in order to substantiate its commitment, including Italy, Ukraine, Poland, Uganda, Morocco, Ivory Coast, El Salvador and Burkina Faso. As a result of these projects, Soleterre now supports **34 health centers**, manages **7 shelters** and has developed **7 medical-scientific research projects**. In Italy, our headquarters staff of **54 individuals partnered with 108 external professionals**. Abroad, we deployed **17 teams**, for a total of **71 local staff members**. Overall, these projects directly had an impact on **62,196 individuals** who all benefited from treatments, training and interventions.

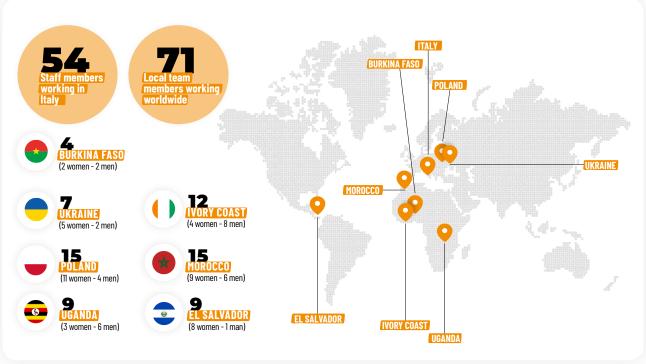

INSTITUTIONAL & OPERATIONAL STRUCTURE:

WHERE WE ARE

Since 2014, Soleterre has been a Foundation and private entity, recognized as ONLUS, with legal responsibility.

GOALS

Soleterre Foundation's main objective is linked to the One Health approach, as defined by the United Nations in December 2021, whereby the health of human beings and the environment are closely connected and interdependent. In this integrated and unifying approach, the balance and the optimization of one person's health with the ecosystem is done in a sustainable way. This approach involves multiple sectors, disciplines and communities to promote well-being and address threats to health and ecosystems, fostering fair and holistic solutions. For Soleterre, health is seen as a state of holistic well-being of the person, in his physical, psychological and social dimension. In the past year, Soleterre confirmed and strengthened its commitment in achieving the following goals:

To support the treatment of oncological disease and non-communicable diseases from children through the promotion of scientific research and medical treatment; through the protection of psychological, emotional and relational well-being for the entire family unit; and fighting the economic poverty and the financial burden of childhood cancer.

To promote the economic inclusion of people in precarious employment conditions recognizing that the improvement of living conditions relies on work and valuable relationships; that job acquisition and security depends upon skill strengthening; that an evolved society is an inclusive society that knows the value of diversity.

relief to people most exposed and vulnerable to social and economic fragility, affected by natural disasters, illness (such as the COVID-19 pandemic emergency) or at social risk (wars, forced migration, violence and abuse, etc.).

PROJECT PARTNER

ACHIEVEMENTS

In 2022, Soleterre continued the promotion, management and monitoring of the two strategic programs that feature its historical vocation: the international program for pediatric oncology, "Great against cancer", carried out in Italy, Ukraine, Morocco, Ivory Coast, Uganda and Burkina Faso; and the international "Work Is Progress" program, promoted in Italy, Morocco, Ivory Coast and El Salvador. After Russia launched the massive attack to Ukraine territory on February 2022, Soleterre immediately strengthened its commitment in Ukraine, and extended it to Poland, to flee the children from war.

psycho-social support (personal progress)

interventions (cultural progress)

273.354

PROGRAM UKRAINE EMERGENCY

In 2022 Soleterre started a Humanitarian Emergency program to cope with the severe consequences of the war in Ukraine, activating medical, psychological, housing and food services for displaced people, children with cancer and war wounded, their parents and family members, both in areas of Ukraine and in the main areas of displacement and refuge along the Polish border.

The initiatives put in place with partners in different countries have evolved into interventions of care, training, assistance, comfort and accompaniment. The interventions have touched a broad spectrum of beneficiaries including sick and injured people, their families and caregivers, socially and occupationally disadvantaged people, displaced and war-traumatized people, medical and nursing staff, educational and school staff, community leaders and institutional representatives. The set of actions deployed resulted in a dense network of awareness-raising initiatives, implemented both online and inperson, on humanitarian emergency issues.

The war in Ukraine and related attacks to the health care system and supply chains generated in very serious impacts on the care of children with cancer, who require in-time access to diagnostic, therapeutic and life-sustaining care.

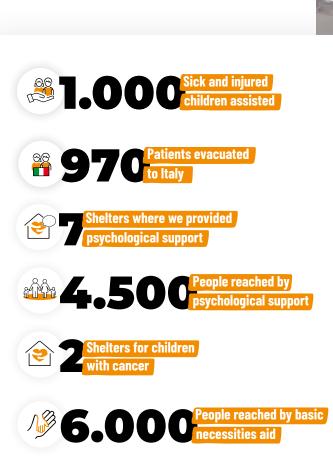

Thanks to a long presence in the country since 2003, and close collaboration with major public pediatric onco-hematology departments, from the very day the conflict broke out, Soleterre took immediate action to bring relief to children hospitalized in serious condition and unable to be discharged: they were first treated for 120 hours under the bombs, in hospital bunkers, and then evacuated out of the country through the global SAFER Ukraine program, together with St Jude Children's Research Hospital, Polish Society of Pediatric Oncology and Hematology (PSPOH), International Society for Pediatric Oncology (SIOP) Europe, Childhood Cancer International (CCI) Europe and various government agencies.

In addition to war, Ukrainian people had to cope with the harsh winter and the lack of electricity and heating. Soleterre took action to ensure immediate emergency response services in the districts of Kyiv, Poltava and Cherkasy, and distributed goods of basic necessities, food and hygiene kits, medicines, economic support, wood and stoves to over 6,000 people in vulnerable conditions.

It also rehabilitated an old building in the municipality of Neslukhiv (Lviv) that is now a home for 30 families coming from war zones in eastern Ukraine. In addition to comfortable housing, the guests receive from Soleterre also economic and psycho-social help to start a new life away from the fighting.

In Poland, Soleterre is considered a benchmark for the provision of services for mental health and psycho-social support. The team, consisting of 7 psychologists and 1 cultural mediator, provides Ukrainian refugees multi-dimensional support.

The interventions take place in refugee centers, shelters, train stations, child-friendly spaces and pediatric hospital wards and, through 2 mobile units, the team is able to reach different locations scattered widely throughout the country.

The main beneficiaries assisted in 2022 include: children, teenagers, adults and the elderly with signs of distress; people with physical and mental disabilities; people with mental disorders and in need of specialized care; survivors of gender-based violence; people with addictions (alcohol and drugs); people with post- traumatic stress disorder; staff of organizations at risk of burn-out; shelter managers and volunteers; pediatric cancer patients and their families.

Meanwhile the organization of medical evacuation flights take place, Soleterre has prepared staff and facilities capable of best welcome oncology patients arriving from Ukraine and destined to be taken under care by 19 different Italian pediatric health facilities located throughout the country. A team of language mediators, psychologists, social workers and reception workers active both through a phone line (to respond to practical, legal and bureaucratic needs), and within a housing facility ("Casa Soleterre"), in Pavia, identified specifically to host families near the Fondazione IRCCS Policlinico San Matteo for a long term.

Casa Soleterre has 12 individual apartments and 3 large communal spaces; in these spaces it was possible to run weekly workshops and Italian classes with a volunteer educator, and organize trips out of town at least once a month, usefull to let people better know the region, and offer moments of serenity away from the hospital environment.

PROGRAM GREAT AGAINST CANCER

2022 marked the 12th anniversary of "Great Against Cancer" international program for pediatric oncohematology. The program started in Europe - Italy and Ukraine - and extended over the years to Africa - Ivory Coast, Uganda, Morocco, Burkina Faso - with the prospect of reaching other countries in the future, starting with El Salvador.

The program is in line with the international goals set in 2018 by the World Health Organization with the "Global Initiative for Childhood Cancer" "which aims to reduce the number of sick children and to increase survival rates globally up to 60%, reducing the social inequality gap between the North and the South of the world.

Great Against Cancer adopts an integrated approach, which aims to guarantee rights and access to care at every stage of the disease and offer holistic support to each child and his / her family, both in accessing quality care and in improving social quality of life and psycho-physical well-being.

We can therefore be proud of the following achievements: 2,868 children and parents have been helped in the daily challenge against cancer, with activities and services in the field, all over the world.

The most important results in 2022:

Support to health center

29.716 Users of the healthcare centers supported

Training

Doctors, nurses and trained operators

Research

Research project

Active researchers

€295.310 Funding for research project

Physiotherapy

Rehabilitation and physioterapy session carried out

195 Child beneficiaries

Housing

885 People hosted

of which 436 children + 449 family guests

Beds available

Psychological support

9.997 Psychological session provided

of which 5.090 sick children + 4.901 for their families

Session with health staff and operators

Individuals receiving support

of which 954 sick children + 992 family careers

With healthcare figures

Financial support

€241.987 Value of the aid provided

Socialization activities

Socialization activities carried out by educators and volunteers

Activities for sick children and their parents

of which 577 children + 565 parents

PROGRAM WORK IS PROGRESS

Soleterre takes care of the needs of those at risk of poverty and economic exclusion, through an integrated **program of accompaniment to work aimed at enhancing the potential of each individual**, helping them to find a worthy job and thus improve their conditions of life.

Work progress

Beneficiaries of information and first guidance

2.904 Beneficiaries of accompaniment to work

Beneficiaries of vocational training

Beneficiaries of self-entrepreneurial activities

Personal progress

Beneficiaries of personalized coaching and psycho-social support

Pupils, parents and teachers benefited by educational interventions

Cultural activities

Community associations leaders trained in 125 training days

Current parterships with public bodies volunteer associations, companies and labor agencies

Territorial coordination and co-programming table open with 242 particular events

People joining

54 public communication events

21.849 Subscribes to social networks

COVID-19 PSYCHOLOGICAL SUPPORT

Soleterre Foundation's Covid-19 psychological support system is aimed to comprehensively assist with economic, emotional and social distress due to the pandemic. We focused on the following: Covid-19 patients, people recovered, persons who lost a beloved one, health staff active on the front lines, individuals unemployed as a result of the pandemic, women victims of domestic violence, homeless people, individuals with addictions and / or previous psychological issues, individuals whose economic and social conditions were seriously impacted by the pandemic, at risk youth, students, parents and teachers.

Total beneficiaries

692 Non-hospital beneficiaries in Italy

209 Total intra-hospital beneficiaries

840 Beneficiaries in schools

The Network involved **90 therapists** in 2022 and reached **901 beneficiaries** cared for in **20 Italian regions**.

2.649 Totals interventions carried out in 2022

Interventions carried out in Covid-19 wards at Fondazione IRCCS Policlinico San Matteo

Long Covid-19
patients interventions

500
interventions conducted
within ongoing
research protocols

1.436
Interventions carried out
by the National Network
for Psychological
Support

Beneficiaries involved in 2022

whose:

Covid-19 patients in treatment at Fondazione IRCCS
Policlinico San Matteo

Patients and beneficiaries from the National Network for Psychological support

450
Health workers and
Covid-19 patients
involved in ongoing
research protocols

104 Long Covid-19 patients

SUPPORTERS, COMMUNICATION AND FUNDRAISING

IN 2022

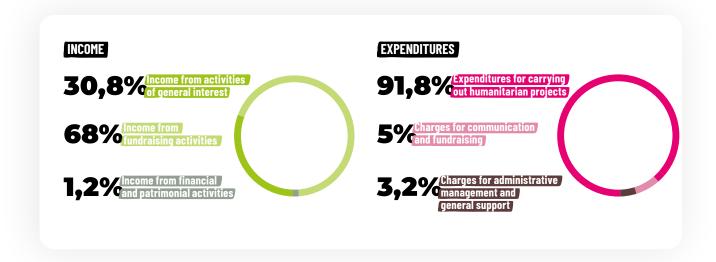

Communication and fundraising activities in 2022 were strongly marked by the crisis in Ukraine and the immediate actions taken to communicate Soleterre's intervention and support request. In particular, the war in Ukraine since 24.02.22 has seen an immediate and effective capacity of the organization in:

- Activate actions to support the affected population, such as airlifting;
- Communicate immediately and effectively on media and social media about its presence in the crisis, the speed of intervention, and the usefulness of donating;
- Organize multichannel fundraising in record time: dedicated landing, social, contacts from media, contacts from 1to1 (companies, foundations, major donors);
- Devote maximum effort in effectively manning each communication and fundraising relationship, at the same time as managing a crisis in a country at war. For the Ukraine emergency, fundraising was 3.971 million euros, while the total fundraising for all of 2022 was 6.992 million euros.

FUNDRAISING

The Foundation's main communications objective was to position itself as a nationally and internationally active agent since the beginning of the war. Soleterre has consistently and tirelessly been operating to keep saving children with cancer and provide emergency humanitarian relief.
